

Highfield Level 2 Award in Legionella Awareness Course (RQF)

Pathway 2: Hot and Cold Water Systems

Is this course for you or your staff?

This Ofqual accredited course is aimed at staff involved in managing, supervising, and monitoring hot and cold systems to ensure the risk presented by Legionella bacteria is minimised and compliance is achieved.

Why should I attend?

This course is designed to raise awareness and reduce the risk associated with the waterborne bacteria that cause Legionnaires' Disease.

Delegates who attend this course will leave with an understanding of how to apply relevant legislation within their day-to-day duties, with a particular focus on the Health and Safety Executive's **Approved Code of Practice L8** and accompanying **Technical Guidance HSG 274** documents.

On the completion of the course candidates will:

- ✓ Understand the symptoms of Legionnaires' Disease and the types of people who are most susceptible.
- ✓ Understand the key requirements of legislation and codes of practice and how they can support the management of legionella bacteria.
- ✓ Understand the importance of risk assessment and how to control the risks of Legionella bacteria and the importance of monitoring control.
- ✓ Understand how to identify roles and responsibilities associated with the management of Legionella bacteria.
- ✓ Understand how hot and cold systems operate and the risks associated with Legionella bacteria in cooling towers and evaporative condensers.
- ✓ Understand how to apply control measures to manage the risks associated with Legionella bacteria in hot and cold systems

Course duration and accreditation:

This is a one-day course which can be delivered at your site for up to 12 people, or individuals can attend one of our open courses at our Training Academy in Barlborough. Successful delegates will achieve a formal Level 2 qualification awarded by Highfield Qualifications Ltd. The qualification is accredited by Ofqual (the Qualifications and Examinations regulator for England and Northern Ireland) and sits on the Regulated Qualifications Framework (RQF).

The Training Academy also offer a half-day course which specifically covers the risks associated with cooling towers and evaporative condensers. If you operate both of these water systems, please contact us today to find out how we can tailor a course to cover the requirements of both cooling towers and domestic hot and cold water systems.

To book a course or for further information please email us on training@advanced-water.co.uk
